

## Info sheet 13

### **Bulford 7 lane clearance**

Duration: 11-12 January 2017

Volunteer hours to date: 125

#### **Brief:**

Clear back byway to allow light to get in and dry out the lane. Cut back hard to give walkers a ledge to walk on so that they aren't in the ruts. Run over two days, this project saw us clear a mile of green road using hand tools only. Permission was given from Wiltshire Country Council and the land owner, in this case, the MOD.

The project involved 25 people split into three teams – one at either end and one in the middle. We also drained a short waterlogged section by digging two grips. The result is now the local parish have the opportunity to walk the lane without negotiating ruts
