

Info sheet 17

Nant Y Arian, Ceredigion

Duration: 1 day - 2011

Volunteer hours to date: 24

Result: Works and drainage still effective 5 years later

Brief:

Repair washouts.

This was the third approved project in Ceredigion, following in line with previous Highways agreements. Again, GLASS Area Reps carried out surveys in advance to ensure legality and route status working in conjunction with the Highways department.

The byway is made up of loose shale towards the northern end and had taken a weathering over a period of time, becoming acutely angled causing concern, and a loss of grip for many users. Ceredigion CC provided a JCB and driver for the 1 day to work alongside a small team of Treadlightly volunteers to level out and grade some short lengths of unsurfaced road, and create various drainage gullies.
