

## Info sheet 2

### **Stony Lane, Banes**

Duration: One month, 2016

Volunteer hours to date: 8

#### Brief:

To work with the local parish and council to access and decide on the best outcome to keep the byway open to all users. Working with the rights of way department and the local parish, GLASS, the TRF, and local users will work together to divert water away from the lane, and improve sections that have been water damaged. The lane will then become subject to voluntary downhill use. This will reduce damage to the surface of the lane and noise to local residents. This work is now complete and the steep section at the bottom has been graded.
